The Pandemics Track

- March 2 **Asiyah Lin**: *Post-workshop Report of WCO-2020: Workshop on COVID-19 Ontologies*
- March 9 **Michael DeBellis** and **Biswanath Dutta** *Uses of Semantic Web Technology to Combat the COVID-19 Pandemic*
- March 16 **John Beverley**: *The Subtle Art of Modeling Pandemics*
- March 23 **Alpha Tom Kodamullil**: *COVID-19 Multilingual Ontologies*
- March 30
  - **Matthew West**: *Disasters as information management failures*
  - **Mariya Evtimova-Gardair**: *Extracting knowledge from the pandemic literature*
  - **Synthesis of the Pandemics Track**

Asiyah Lin

- Interdisciplinary background in medicine, immunology, molecular biology, medical informatics, and e-commerce entrepreneurship with a focus in ontology-based data, information and knowledge management and integration solutions for bio and health data.
- A knowledgeable ontologist with expertise in a wide variety of artificial intelligence (AI) semantic technologies, strategic design, business analysis, process development, and project control and coordination in the medicinal product regulation and biomedical research space.
- Advocates leveraging ontologies for data interoperability and establishing a knowledge eco-system for science and regulatory communities.
- Initiated and manages the OHDSI Medical Device Working Group, COVID-19 ontology harmonization group, and the FDA-NIH ontology round table discussion group.
- Currently with the NIH's Data and Technology Advancement National Service Scholar program, Asiyah coordinates NIH internal and external stakeholders for the NIH Cloud Platform Interoperability (NCPI) to build the genomics data ecosystem.
